

## DESCRIPTION

DDP400 and MDP400, SC series, are sealed, full potted, compact, high efficiency, small form factor AC-DC power supplies.

The series provide a steady 400 W of regulated DC power through the full 90 to 264 V<sub>AC</sub> input range. A 3.27" x 8.34" x 1.65" form factor, enable designers to integrate it into 1U applications.

By converting energy at a typical 94% efficiency, the DDP400 and MDP400 SC series generate less heat facilitating thermal management in space constrained environments, resulting in very high reliability.

Both the DDP and MDP SC series are available in four standard output voltages: 12, 24, 36, 48 V<sub>DC</sub>, offer an auxiliary 12 V<sub>DC</sub> and a stand-by 5 V<sub>DC</sub> outputs. Available control signals include Power Good (Power\_OK), remote On/off (PS\_ON) and remote sense (+RS).

The sealed and full potted package allows an IP67 ingress protection index, and can be installed in contact with thermo-conductive part of the system so to transfer heat by conduction, therefore, enhancing performances.

When conduction cooled, or convection cooled with its optional heat sink assembled, the SC series can deliver full output power from -20 to 50 °C. It can operate up to 70 °C with de-rating and is capable to start up from - 30 °C.

Protection features do include fuse on each AC lines, input under-voltage lockout (IUV), output over-current (OC), output short-circuit (SC), output over-voltage (OV) and over-temperature (OT).

The MDP400 range comply with the 3<sup>rd</sup> edition of the UL/IEC 60601-1 safety standards for medical equipment offering 2x MoPP protection grade and the DDP400 range comply with the 2<sup>nd</sup> edition of the UL/IEC 60950-1 standards for IT equipments. Both the series meets the EN55022 EMC limits of Class B for conducted and radiated emissions as well as the IEC/EN 61000-3 and IEC/EN 61000-4 EMC standards.

IP67 cUL<sup>®</sup>us ⓓ CE

## KEY FEATURES

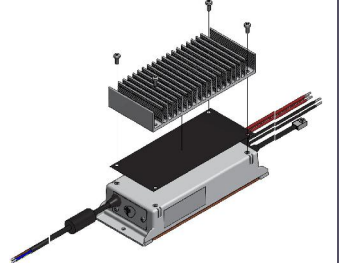

- 90 – 264 V<sub>AC</sub> Universal input voltage range
- 400 W rated power (440 W peak for <10s)
- High efficiency (94% typical)
- Low stand-by consumption (<0.5 W)
- 12, 24, 36 and 48V standard output variants
- Active PFC, EN61000-3-2 compliant (Class C)
- Low earth leakage current
- Over temperature protection
- OV, OC, and short circuit protections
- Stand-by +5 V, 2 A; Auxiliary fan +12 V, 1 A
- Remote On/off and power good signals
- ANSI/AAMI ES60601-1 3<sup>rd</sup> ed. compliant
- IEC/EN/UL 60601-1 2<sup>nd</sup>/3<sup>rd</sup> ed. compliant
- 2x MoPP protection grade
- RoHS 2 compliant (Directive 2011/65/EU)
- 4000 m altitude operation without de-rating

## MARKET SEGMENT AND APPLICATIONS

- Video Wall Display and Entertainment
- Industrial and Process Control
- Telecommunications
- Laboratory Equipment
- Test and Measurement Equipment
- Medical applications

| <b>DDP/MDP400-US48-SC (-PP)</b> | 48  | 7.3 <sup>4</sup>                  | 8.3                            | 480             | 12  | 1               | 240             | 5                | 2                              | 50                            |

<sup>1</sup> The combined output power of V1, V2 and 5V<sub>SB</sub> for all models, when convection cooled and V<sub>IN</sub> ≥ 180 V<sub>RMS</sub>, must not exceed 350 W up to 50 °C, and 240 W at 70 °C ambient temperature. See de-rating curves below.

<sup>2</sup> The combined output power of V1, V2 and 5V<sub>SB</sub> for all models, when conduction cooled or convection cooled with heat sink mounted, must not exceed 400 W up to 50 °C, and 300 at 70 °C ambient temperature.

<sup>3</sup> Peak-to-Peak measured at 20 MHz Bandwidth.

<sup>4</sup> Convection / Conduction output current ratings, do refer to <50 °C ambient temperature and V<sub>IN</sub> ≥ 180 V<sub>RMS</sub>.

<sup>5</sup> In any case, the chassis hot spot temperature T<sub>C</sub> should never exceed 90 °C.

## INPUT SPECIFICATIONS

| Signal                        | Notes   | Min  | Typ | Max | Unit |
|-------------------------------|---|------|-----|-----|------|
| <b>PS_ON</b>                  | Active low, +5 V TTL signal compatible. Input low voltage       | 0    | -   | 2.0 | V    |
|                               | Input high voltage ( $I_{IN}=200\ \mu\text{A}$ )                | 3.0  | -   | -   | V    |
|                               | V1 and V2 disabled when PS_ON is open                           |      |     |     |      |
|                               | 5V <sub>SB</sub> not affected by PS_ON                          |      |     |     |      |
| <b>P_OK</b>                   | V1 and V2 enabled with PS_ON connected to RTN                   |      |     |     |      |
|                               | +5 V TTL compatible   |      |     |     |      |
|                               | Logic level low (<10 mA sinking)                                | -    | -   | 0.7 | V    |
|                               | Logic level high (100 $\mu\text{A}$ sourcing)                   | 2.4  | -   | 5   | V    |
|                               | Low to high time after V1 in regulation                         | 0.05 | -   | 0.1 | S    |
|                               | Power down warning time   | 1    | -   | -   | Ms   |
| <b>5V<sub>SB</sub> output</b> | Active and in regulation after a $90 < V_{AC} < 264$ is applied | -    | -   | 200 | Ms   |
|                               | 5V <sub>SB</sub> not affected by PS_ON                          |      |     |     |      |

Above waveforms are expected with AC Input ON/OFF:

|  |   |
|--|---|
| Standby on - Main outputs on               | $50\ \text{ms} \leq T1 \leq 250\ \text{ms}$ |
| Main output Rise Time                      | $5\ \text{ms} \leq T2 \leq 110\ \text{ms}$  |
| 5 VSB Rise Time                            | $4\ \text{ms} \leq T10 \leq 20\ \text{ms}$  |
| Main outputs On - P_OK delay               | $25\ \text{ms} \leq T3 \leq 100\ \text{ms}$ |
| Power down warning <sup>1</sup>            | $T4 \geq 1\ \text{ms}$                      |
| Main Output off - Standby off <sup>2</sup> | $T5 \geq 1.2\ \text{s}$                     |
| Hold-up time (AC off - P_OK low)           | $T6 \geq 15\ \text{ms}$ (115/ 230 VAC)      |
| AC_ON - Standby turn on time               | $T7 \leq 500\ \text{ms}$                    |

Above waveforms are expected with PS\_ON Signal ON/OFF state change:

|                                  |   |
|----------------------------------|---|
| Main Output Rise Time            | $5\ \text{ms} \leq T2 \leq 110\ \text{ms}$  |
| Main Outputs on - P_OK delay     | $25\ \text{ms} \leq T3 \leq 100\ \text{ms}$ |
| Power down warning <sup>1</sup>  | $1\ \text{ms} \leq T4 \leq 5\ \text{ms}$    |
| PS_ON - Main Output (off) Timing | $T8 \leq 1\ \text{ms}$                      |
| PS_ON - Main Output (on) Timing  | $T9 \leq 200\ \text{ms}$                    |

<sup>1</sup> T4 parameter measurement setup will assume at least 10% of the maximum load on each output.

<sup>2</sup> T5 parameter measurement setup will assume 50% of the maximum load on 5V<sub>SB</sub>.

### Cooling

Convection with or without heat sink and conduction providing an adequate thermal path between the unit and the external environment. Case hot spot temperature, T<sub>c</sub>, should not exceed 90 °C in any working condition.

## ELECTROMAGNETIC COMPATIBILITY (EMC) – EMISSIONS
